# G10

Infrared sensor

IR Phototransistor

Applications

The infrared sensor will make it possible to map in 2D and 3D any system that emits in this wavelength. Infrared remote control, projector for infrared camera, etc ... This will allow to realize a radiation diagram of the emission power of an infrared LED

Specifications

Detector	VEMT2000
Unit	p(mW/cm²)
Sensitivity	--

Example

Outdoor
IR
Illuminator
