

G03

Telecom Frequency

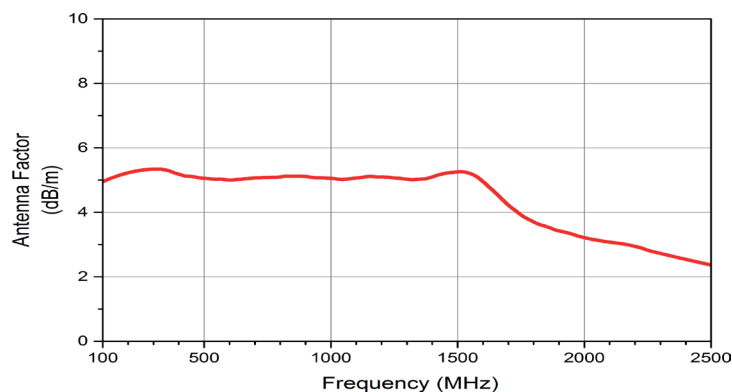

Applications

The AD8313 is a detector used to map telecom frequency radiation. (RSSI measurement, radio link, radar, 3G, 4G, 5G...)

Specifications

Diameter of the loop	12mm
Number of turns	1
Detector	AD8313
Frequency	100kHz to 2500 MHz
Unit	dBm
Sensibility	-70 dBm

Antenna Factor

Example

Smartphone in communication
