

G05

TruPwr™ Detector 50 MHz - 3.8 GHz

Applications

The AD8362 detector is mainly used to measure the power of wireless communications (GSM/CDMA/TDMA... Waveform and modulation independent)

Specifications

Antenna shape	Differential U form
Antenna length	27 mm x 2
Detector	AD8362
Frequency	50 MHz to 3800 MHz
Unit	dBV
Input dynamic range	-70 to -20

Example

Radio transmitter
433 MHz
